

TO WHOM IT MAY CONCERN:

It is my wish that xm and sirius be permitted to broadcast any thing that the market will support.

I had quit listening to the radio until xm came along. The material on regular broadcast radio, and the endless commercials have made it useless.

I am not a spendthrift and would not pay for xm if there were an alternative for free.

I don't know how it is in the cities but in the rural part of alabama where i live, if you can receive a standard broadcast station without static, the material sux.

Let us pay for what we want and get what we pay for. Reject petition 04-160 and keep satelite radio alive and well

Jim Clinton
